```
{
  "message": "prod"
}
```

То же справедливо для порта 8083 и dev окружения

```
{
  "message": "dev"
}
```

Не забываем создать отдельную базу данных и выполнить в неё миграцию

```
osm@ubuntu-s-1vcpu-1gb-fra1-01: /var/www/todo_project-dev$ php bin/console doctrine:migrations:migrate

WARNING! You are about to execute a migration in database "todo_dev" that could result in schema changes and data loss. Are you sure you wish to continue? (yes/no) [yes]:
