

## Работа клиентских гит-хуков

На скриншоте видно, как работает `phpcs fix` и как `commit-message` не допускает ошибочного формата сообщения

```
meme@ubuntu-s-1vcpu-1gb-fra1-01:/var/www/todo_project-dev$ git commit -m "test message"
Loaded config default from "/var/www/todo_project-dev/.php-cs-fixer.dist.php".
Using cache file ".php-cs-fixer.cache".
Paths from configuration file have been overridden by paths provided as command arguments.
1) src/Controller/RegistrationController.php Fixed all files in 0.036 seconds, 16.000 MB memory used
Error in commit message. Correct input format is: [issue id]message
```

Пример работы с правильным сообщением

```
meme@ubuntu-s-1vcpu-1gb-fra1-01:/var/www/todo_project-dev$ git commit -m "[55] final"
Loaded config default from "/var/www/todo_project-dev/.php-cs-fixer.dist.php".
Using cache file ".php-cs-fixer.cache".
Paths from configuration file have been overridden by paths provided as command arguments.

[ci/cd e42d037] [55] final
1 file changed, 5 insertions(+)
```

И наконец серверный хук (правой)

```
PS D:\PHPShtorm> git push git@165.22.93.105:/var/www/git/todo_project-dev.git HEAD
